

Revised 116B

ADOPTED AS REVISED

RECOMMENDATIONS

- 1 RESOLVED, That the American Bar Association urges states and territories to provide for
2 mutual telemedicine licensure recognition, whereby a physician with a current, valid and
3 unencumbered license in any jurisdiction could file a single application which would permit the
4 physician to practice telemedicine in some or all other jurisdictions subject to continuing
5 compliance with those jurisdictions' licensure fees, discipline, and other applicable laws and
6 regulations, and adherence to professional standards of medical care.
7
8 FURTHER RESOLVED, That such legislation should specify a uniform definition of
9 telemedical practice, the requisite procedures for telemedical licensure, jurisdictional
10 requirements, and the continuing role of medical boards in physician licensure and discipline.

(Deletions struck through; Additions underlined)
